

Please amend claims 5, 11, 13, 15-17 as follows:

*Subj* 5. (Once Amended) A portable device for sending information to called stations over a telephone line, comprising:

- a. a device memory;
- b. a docking port for receiving information from an external memory and loading said information into said device memory, wherein said information comprises card information relating to a telephone purchase and is received from a seller memory connectable to said external memory;
- c. a converter for converting said information from said device memory into an audible representation of said information; and
- d. a send key for activating said converter;  
whereby, by activating said send key, said audible representation is presented to a microphone of a telephone set for transmission to at least one of said called stations.

*Q 2* 11. (Once Amended) A method of sending information related to a telephone purchase from a customer to a seller, comprising the steps of:

- a. providing an element for performing the step of storing information, including card information, received from a seller in memory located at a customer-site telephone; and
- b. providing an element for performing the step of subsequently sending said information from said memory located at the customer-site telephone to a seller.

*Q 3* 13. (Once Amended) A method of sending information related to a telephone purchase from a seller to a customer, comprising the steps of:

- a. providing an element for performing the step of recording information from said customer in digital form; [and]
- b. providing an element for performing the step of determining whether a telephone of said customer is memory equipped; and

A4 [b]c. providing an element for performing the step of sending said information from said seller to said memory equipped telephone of said customer for storage.

~~Excluded~~ 15. (Once Amended) A system for sending and receiving orders for goods, comprising:

- a. a telephone at a customer site having a customer memory for storing and sending information;
- b. a telephone at a seller site having a seller memory and a display for respectively storing information, provided by said customer and keyed in by personnel at said seller site and stored in said seller memory, confirming whether a telephone of said customer is memory equipped, and sending information stored in said seller memory to said customer [site] memory for use during a subsequent order; and
- c. a telephone network connecting said telephone at a customer site with said telephone at a seller site while an order for goods is placed.

Q5 16. (Once Amended) A computer program product for sending information related to a telephone purchase from a customer to a seller, comprising:

- a. a memory medium; and
- b. a computer program stored on said memory medium, said computer program comprising instructions for storing information received during a first purchase transaction from a seller over a telephone line in memory and for subsequently sending said information to a seller for use during a second purchase transaction.

17. (Once Amended) A computer program product for sending information related to a telephone purchase from a seller to a customer, comprising

- a. a memory medium; and
